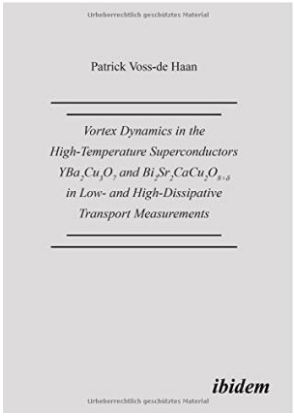
VORTEX DYNAMICS IN THE HIGH-TEMPERATURE SUPERCONDUCTORS YBA2CU3O7 AND BI2SR2CACU2O8+D IN LOW- AND HIGH-DISSIPATIVE TRANSPORT MEASUREMENTS



Ibidem. Taschenbuch. Book Condition: Neu. 210x148x8 mm. Neuware - Since their discovery in 1986, high-temperature superconductors (HTSC) are considered interesting physical systems as well as attractive candidates for a variety of technical applications. In both cases one of the key aspects to be understood is the mechanism of power dissipation, which depends primarily on vortex dynamics: the movement of magnetic flux lines in the superconductor when a transport current is applied.The present work studies vortex dynamics in experiments on two...
