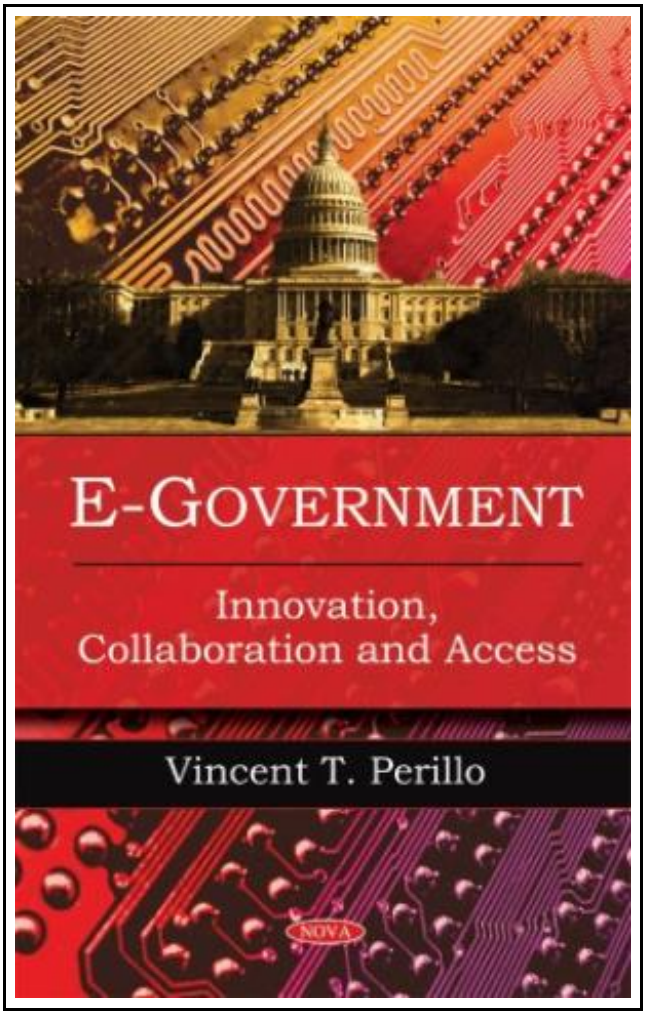
E-Government: Innovation, Collaboration and Access



Filesize: 3.29 MB

Reviews

A top quality ebook and the typeface used was interesting to read through. It is rally intriguing throgh reading through period. You wont feel monotony at anytime of the time (that's what catalogues are for relating to when you ask me).

(Estelle Donnelly)

Nova Science Publishers Inc. Hardback. Book Condition: new. BRAND NEW, E-Government: Innovation, Collaboration and Access, Vincent T. Perillo, The use of information technology to provide consistent access to and dissemination of government information is essential to promote a more citizen-centred government in a cost-effective manner. Agencies manage web-based technologies and services to help citizens obtain government information and services. In addition, agencies use information technology to communicate with the public and gather feedback to determine whether Federal programs are achieving results and meeting user needs. E-Government is the result of this use of information technology to improve citizen access to government information and services. To ensure agencies apply E-Government principles and use information technology to the fullest potential, agencies measure results to verify progress and planned performance improvement. This allows agencies to better manage their information resources including their investments in information technology. The Office of Management and Budget (OMB) works with agencies to systematically track and measure whether resources used by programs help achieve intended goals and results through the Presidents Management Agenda (PMA) Scorecard each quarter. The Federal Government continues to deploy industry-leading information technologies to more effectively manage and deliver government information and services. This results in more effective and transparent operations of Federal programs with an increased ability to manage the risks associated with information technology and protect information in care of the Federal government. Greater access to government information benefits the country by sustaining an informed citizenry, aiding government decision-makers, and supporting the economy, all of which are fundamental to a healthy democracy.
