Purchasers can download a free scanned copy of the original book (without typos) from the publisher. Not indexed. Not illustrated. 1838 Excerpt: . and the angles at each end, formed by the line with the bearings of the barometer at each station, will be all that is necessary for taking two strides with sufficient accuracy. As the barometer will give a good approximation to the true height at every station, and as the distances may be pretty accurately taken; a profile across an extensive district may be taken in a short time. From five to ten miles per day may be taken by an experienced surveyor, and a skilful barometer-bearer. If notes are extensively taken, much of the character of the country may be presented on, or accompanying, the profile and sketch-book. Sec. 167. The barometer should be applied twice at every sta. tion in the same day. It is found, that when the atmosphere is uniform, and the barometer is not influenced by change of temperature nor...
