Anthropogenic influence on the Tibetan Plateau

By Roman Kühn

GRIN Verlag Gmbh Sep 2014, 2014. Taschenbuch. Book Condition: Neu. 211x136x14 mm. Neuware - Seminar paper from the year 2014 in the subject Geography / Earth Science - Regional Geography, grade: 2,3, RWTH Aachen University (Geographisches Institut), language: English, abstract: The Tibetan Plateau is probably the most important and one of the most fragile areas in the world. With its enormous tectonic geomorphology forms and its unique ecosystem the Tibetan Plateau has an huge impact on the asian continent and even on the whole global climate (Cui/Graf 2009:49). For hundred of years this area was inhabited by few nomads, who practiced a sustainable approach of life in this space. Initiating with the reforms of ' the Great Leap Forward, the Opening Door Policy and the Globalisation' an imigration flow began to discover and settle down. Those hu-man activities had an influence on the climate change and land-cover change. The consequences resulting thereoff are evident and measurable and the aftereffects of that development cant yet be foreseen in their whole scale. The purpose of this study is to examinethe anthropogenic influence on the Tibetan Plateau in recent years. The structure applied to this paper begins with a geographic classification of the...
