Mathematical Questions with Their Solutions, from the Educational Times Volume 29 (Paperback)

By D Biddle

Rarebooksclub.com, United States, 2012. Paperback. Book Condition: New. 246 x 189 mm. Language: English . Brand New Book ***** Print on Demand *****.This historic book may have numerous typos and missing text. Purchasers can download a free scanned copy of the original book (without typos) from the publisher. Not indexed. Not illustrated. 1885 Excerpt: .a cos a when a varies, referred to X and a line through C perpendicular to it is, xy =.1-c2, an equilateral hyperbola whose foci are S and S . Again, it may be remarked that, as a tangent from any point to a conic is, at the point of contact, normal to a confocal conic, the same circular cubic will be the locus of the extremities of all normals drawn from a given point O to a system of confocals. The equation of this cubic may also be obtained by combining the equation of the pair of tangents to a conic from a point, referred to elliptic coordinates, with the equation of the polar of the point similarly referred. 7350. (By Dr. Cuetis.)--If there be circumscribed to a given conic a polygon of m sides, such that the ares between the consecutive points of contact...
